# TMFR Dispatch & Communications

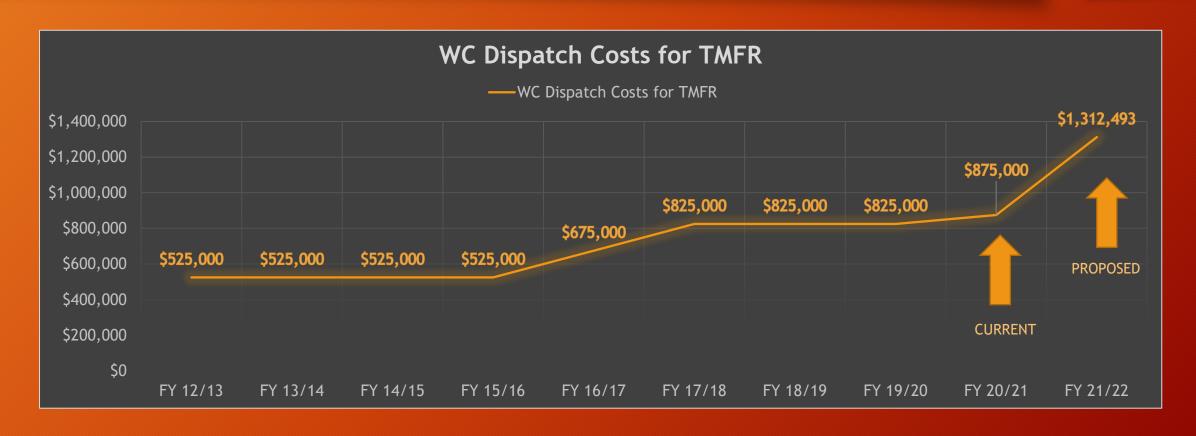

## Current Washoe Dispatch/TMFR Arrangement

- TMFR currently contracts dispatching services to Washoe Dispatch
- Washoe Dispatch is managed by the Washoe County Sheriff's Office and all dispatchers are employees of WCSO
- Dispatchers are cross-trained for Fire, EMS, & Law Enforcement dispatch functions
- Standardized systems are used for dispatch processing (EFD, EMD, EPD)
- TMFR has one dedicated fire dispatch console and one consistently staffed radio channel. Other dispatch staff may intermittently staff additional channels depending upon availability and system volume

## Washoe Dispatch-TMFR Annual Fees

#### **Current EMS Dispatch Process**

911 Call Received at Washoe Dispatch

Basic Call information gathered by Washoe Dispatch and caller is transferred to REMSA for EMD

REMSA also acquires basic call information and provides EMD and pre-arrival instructions

TMFR resources switch back to Washoe dispatch for incident tracking and additional communications

REMSA acquires detailed call information (EMD) that is relayed to responding ambulance. TMFR resources switch to REMSA radio channel to acquire details & priority

TMFR resources dispatched by Washoe dispatch & REMSA ambulance concurrently dispatched by REMSA

### **Proposed Dispatch Process**

911 Call Received at Washoe Dispatch

If determined to be Fire or EMS related, call is transferred to REMSA for EMD/EFD & simultaneous ambulance/fire engine dispatch

REMSA acquires detailed call information (EMD/EFD) that is concurrently relayed to responding units from both agencies.

## Dispatch Alternatives Analyzed

- 1. Remain status quo with Washoe Dispatch at \$1,312,492/year (\$437,493 annual increase)- NOT RECOMMENDED
- 2. Contract with the City of Reno (RFD) for dispatch services at \$718,263 for year 1- NOT RECOMMENDED (Further Analysis on Next Slide)
- 3. Contract with the City of Sparks for dispatch services- NOT RECOMMENDED
- 4. Contract with REMSA for dispatching services- RECOMMENDED
- 5. Establish an independent TMFR dispatch center- NOT RECOMMENDED

### Stakeholder Involvement

- TMFR Division Chiefs
- TMFR Morning Briefings with All Staff
- IAFF Local 2487
- REMSA Management
- REMSA Dispatch/IT Staff
- WC District Attorneys Office

- Washoe County Regional Communications (Radio System)
- Washoe County Information Technology Services
- Radio/CAD Vendors
- Regional Fire Agencies

## Comparison of REMSA v. Reno Dispatch

#### **REMSA Dispatch**

- TMFR/REMSA co-respond on 85% of incidents
- \$690,530 in Year 1
- \$588,346 in estimated one-time equipment/software costs
- 2% annual increase
- EMD capable with accredited program & EMS Dispatchers
- AVL capable CAD to send closest resources to incidents
- Radio systems are interoperable through patched channels
- Integrates CAD data to billing system
- Inexperienced with Fire Dispatching
- Currently utilizing a separate CAD from other agencies
- TMFR will control fire related dispatch policies

#### Reno Dispatch

- TMFR/RFD co-respond on approximately 2% of incidents
- \$718,263 in Year 1
- No known equipment/software costs
- Estimated 5-8% annual increase (TM projections)
- No current EMD capabilies
- CAD does not have AVL capabilities
- Common radio system
- Cannot automatically pass CAD data to billing programs
- Experienced with Fire Dispatching
- Currently utilizing a common CAD with other agencies
- TMFR may need to conform to current RFD policies

#### **Radio System Configuration**

911 Call Received at REMSA/TMFPD Dispatch

EMD/EFD Information
Entered for Dispatchers

REMSA Dispatcher Dispatches REMSA Resources

TM Fire Dispatcher Dispatches Fire Resources

UHF 800 MHz

800 MHZ/VHF TM CMD1

Single Resource Response (EMS/MVA) 800 MHz/UHF Patched Channel

MED 10/REMSA 2

Single Resource Response (EMS/MVA) Multiple Resource Response (Structure Fire, Brush Fire, Hazmat, Extrication MVA)

## Mutual/Automatic Aid Requests

- TM has direct mutual aid agreements with 13 agencies (and Statewide with all FD's)
- Most are requested via phone between dispatch centers
- CAD to CAD requests are optimal and would be configured with Washoe County agencies upon establishing a regional CAD system, or utilizing possible CAD to CAD links in the interim

## Implementation Plan

- Staff will finalize a full implementation plan, timeline, and project management program
- REMSA staff to begin EFD qualification and cross-training of existing/experienced staff and are reviewing dispatch audio tapes of current TMFPD incidents to familiarize with current practices and terminology
- Necessary equipment will be ordered & installed with redundancies & testing
- CAD programming and testing will be implemented with TMFPD staff oversight
- Current TMFPD dispatch policies will be revised and implemented with REMSA staff
- Go live date projected between 10/1/21- 1/1/22 (outside of peak fire season demand), but not before all testing meets requirements

#### Of Note:

- TMFPD will retain ownership of all purchased radio equipment and dispatch consoles.
- The service contract will ensure TMFPD controls oversight of operational dispatch policies & procedures
- The term of the service agreement is recommended to coincide with the roll-out of the new regional CAD system (likely 24-36 months). REMSA & TMFPD have expressed intent to migrate to that system as it becomes available.

## Future Opportunities

- Regional CAD system is being designed with an RFP going out soon
- E911 funding will purchase the system for the region
- ALL agencies (including TMFR & REMSA) should be part of the new CAD
- The new CAD timeline is likely 24+ months away from operability
- Regionalization/co-location of dispatch entities

#### Recommendation

- 1. Proceed with development of a final contract for dispatch services with REMSA
- 2. Begin the process of acquiring the equipment, software & components needed to begin operations with REMSA
- 3. Concurrently work towards a future regionalized CAD system or dispatch center with TMFR participating in the interlocal governance agreement of the new system

## Questions???
